SUBJECT: **STATUS REPORT ON KEY INDICATORS OF PROGRESS,  
HOSPITAL OPERATIONS, AND OTHER ISSUES RELATED  
TO THE TRANSITION TO THE NEW LAC+USC MEDICAL  
CENTER – PROGRESS REPORT #44 (Agenda Item #S-1,  
November 9, 2010)**

**John F. Schunhoff, Ph.D.**  
Interim Director

**Gail V. Anderson, Jr., M.D.**  
Interim Chief Medical Officer

This is to provide your Board with the bi-monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report contains the full monthly operational report for September 2010 (delayed from last month at request of the Board). Also included is the interim report of Emergency Department (ED) and hospital admission volumes as well as specialty services with trends to include the month of October 2010.

**Census Trending** (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of October was 596 out of 671 licensed beds, an estimated 88% utilization rate (90% occupancy). The census for Medical/Surgical units was an estimated 98% utilization rate (100% occupancy) for October 2010.

**Emergency Department (ED) Indicators and Specialty Services**

September 2010 Monthly Operational Report (Attachment 1) -- illustrates increases in ED Boarding Time, Diversion and Average Length of Stay (ALOS) for September 2010. The measures for ED Wait Time, Left Without Being Seen (LWBS), Crowding Level Comparison and Patients Transferred Out have decreased during this reporting period. Of particular note is a 14% reduction in the highest level of overcrowding. The number of patients transferred out in September was consistent with the average number of patients transferred out over the last 4 months since May 2010.

October 2010 Interim Report (Attachments 2 and 3) – these illustrate the trending of ED registration as well as admissions to both the ED and the hospital and specialty care trending. Hospital admissions were 2,817 for October 2010 which represents a 4% increase compared to the 2,709 admissions for September 2010. ED registration volumes were consistent. The ADC trends for specialty care areas of OB/GYN, Pediatrics, ICU, Psychiatry, Jail and Burn Units demonstrated no significant changes.

through leadership,  
Service and education.*

### **Analysis of Trends and Mitigative Actions**

As previously reported, a number of changes have been implemented within the physical structure and organization of the ED, with primary emphasis on reduction of time to Medical Screening Examination (MSE). These changes have resulted in significant reductions in LWBS, thereby reducing the percentage of patients leaving the ED without a MSE by more than one half in the last two months. This equates to serving more than 400 patients/month who previously left without a MSE. Efforts to secure additional transfer agreements are underway by the CEO of the hospital. Finally, the ALOS continues to rise as a result of transferring out the least acute patients, leaving the most critical patients in the facility. As previously demonstrated, increases in diversion have little effect on patient destination since the hospitals in the geographic area surrounding LAC+USC are also on diversion simultaneously. Therefore, Emergency Medical Services (EMS) policies require continued transport to the original hospital destination. Past analysis has demonstrated that this only affects an average of one patient in a 24-hour period.
